Britain left the European Union in January and is now in a transition period which will finish at the end of December, during which Britain remains part of the single market and customs union. During this period the UK Government and the European Union are seeking to negotiate a longer term trade deal between the UK and the European Union.

If Britain HAS agreed a long term trade deal with the European Union how much disruption, if any, do you think there will be when the transition period ends?

A lot of disruption
A fair amount of disruption
