

Future of Air Travel
Fieldwork Dates: 7th - 8th May 2020

**Conducted by YouGov
YouGov RealTime**

© YouGov plc 2020

BACKGROUND

This spreadsheet contains survey data collected and analysed by YouGov plc.

Methodology: This survey has been conducted using an online interview administered to members of the YouGov Plc panel of individuals who have agreed to take part in surveys. Emails are sent to panelists selected at random from the base sample. The e-mail invites them to take part in a survey and provides a generic survey link. Once a panel member clicks on the link they are sent to the survey that they are most required for, according to the sample definition and quotas. (The sample definition could be "US adult population" or a subset such as "US adult females"). Invitations to surveys don't expire and respondents can be sent to any available survey. The responding sample is weighted to the profile of the sample definition to provide a representative reporting sample. The profile is normally derived from census data or, if not available from the census, from industry accepted data.

YouGov plc make every effort to provide representative information. All results are based on a sample and are therefore subject to statistical errors normally associated with sample-based information.

For further information about the results in this spreadsheet, please email uspress@yougov.com quoting the survey details

EDITOR'S NOTES - all press releases should contain the following information

All figures, unless otherwise stated, are from YouGov Plc. Total sample size was 1432 adults. Fieldwork was undertaken between 7th - 8th May 2020. The survey was carried out online. The figures have been weighted and are representative of all US adults (aged 18+).

- YouGov is registered with the Information Commissioner
- YouGov is a member of the British Polling Council

Any percentages calculated on bases fewer than 50 respondents must not be reported as they do not represent a wide enough cross-section of the target population to be considered statistically reliable. These figures will be italicised.
